

Enabling Speech to Text Early Access

1. Download and Open the Premiere Pro beta app

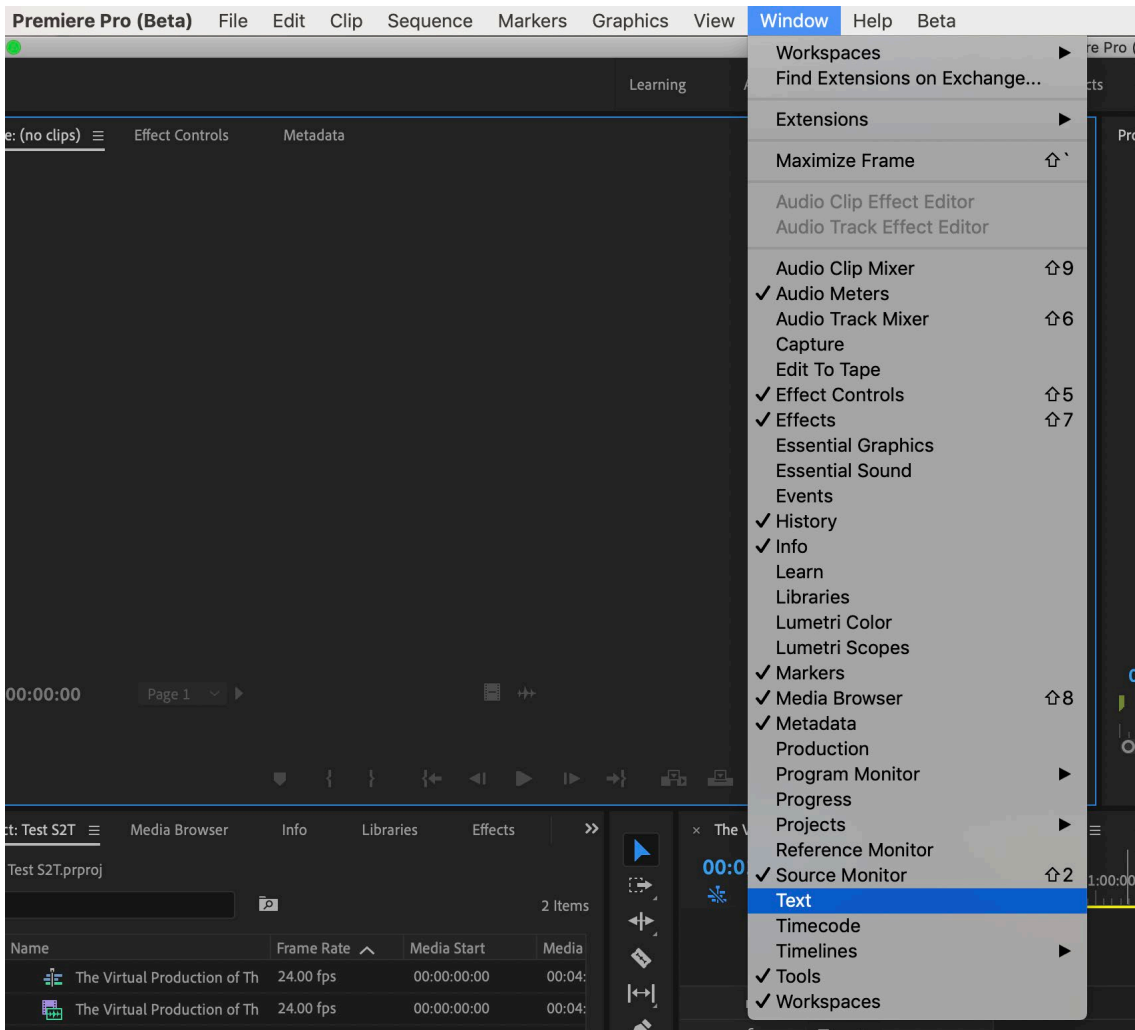

Open your Creative Cloud desktop app and navigate to “Beta” apps. Click to install the latest version of the application.

(Don't see the Premiere Pro Beta application in your Creative Cloud Desktop? Click Help > Check for updates in the Menu bar, or try restarting the application.)

2. Open the new Text panel

Once you have your project open, navigate to Window > Text in order to see the new text panel.

From here, you will be able to follow the panel's instructions to transcribe sequences.
